Abstract (en)

[origin: WO2006087610A1] A deodorizing device (1) for environments, particularly for automotive vehicle passenger compartments, comprising a case (2) which contains a deodorizing substance (D) and is provided with at least one portion (4) which is permeable to the vapors of the deodorizing substance and is adapted to be struck by the stream of air (F) that flows out of a vent (B) at a region where a pressure drop occurs due to the reduction in cross-- section determined by the placement of the case on the outflow front of the stream.
