Abstract (en)
[origin: US2008005906A1] An electric hair trimmer, in particular an electric razor, features a hair trimmer that includes at least one shaving system having an outer cutter and an undercutter, said cutters cooperating in order to cut off hairs. The outer cutter has at least one inner surface that is adjacent to the undercutter, at least one outer surface provided for contact with the skin, and at least one lateral surface that extends between the contours of the inner surface and the outer surface. The lateral surface and the outer surface of the outer cutter define an at least partially acute-angled first edge.
