Abstract (en)

[origin: CA2593824A1] The inventive water processing device for producing drinking water comprises a substantially cylindrical housing, means (2) for introducing a treatable water and means (3) for discharging the treated water which interact with the housing (1), and a plurality of means forming UV lamps (4), wherein said device is characterised in that said UV lamp forming means are arranged inside said housing in such a way that the longitudinal axes of at least several of them form a non-zero and different from 90° angle with the longitudinal axis of the substantially cylindrical housing (1).
