Abstract (en)

[origin: WO2006077135A1] The invention relates to a sanitary fitting (1), in particular, a washstand fitting, comprising a connecting device (7) which is used to connect a water outlet housing (2) to a functional component (4), in particular a valve block. Said connecting device (7) comprises a clamping device (10, 11, 12, 15) which enables the functional component (4) to be temporarily fixed to the water outlet housing (2) by means of relative displacement, and a tensioning device (19, 20, 21) which enables the functional component (4) to be connected in a stable manner to the water outlet housing (2).
