Abstract (en)

[origin: WO2006058957A1] Recreational application programs are offered for execution through players' terminals. Said recreational application programs involve at least one of playing and gambling. The system comprises an event model (301), which is a process adapted to represent a sequence of subevents in a target event (202, 203, 204) in real time. The system is adapted to offer the execution of a recreational application program through players' terminals as a response to an incident taking place in said event model (301).
