Abstract (en)

[origin: EP1839874A1] The arrangement (1) has container (18) for holding the cartridge in a fixed position. A seal element (45) at the container has a passage (47) for a liquid or gaseous fluid. The seal element in the fixing position lies against the injector plate that a fluid stream produced flows through only a part of the nozzle rows in the passage. An independent claim is also included for a method for filling a cartridge of a ink jet printer.
