Abstract (en)

[origin: EP1840920A2] The cover (10) has a blocking unit (34) provided at a support bar (18), where the unit is movable from a resting position to an operating position. The rotation of an indicator device (22) with a lever arm is blocked/not blocked in the respective resting and operating positions. The blocking unit is provided in the resting position when a locking device is not held in the bar. The blocking unit is provided in the operating position when the device is held in the bar.
