Abstract (en)

The method for operating a hearing instrument (100) having audio feedback capability, comprises the steps of #c retrieving coded audio data from a storage element (9) of the hearing instrument (100); #c decoding (12) the coded audio data, thereby generating a decompressed audio message signal; #c optionally processing the decompressed audio message signal by a processing unit (4); and #c outputting the decompressed and optionally processed audio message signal to a user.
