Abstract (en)
[origin: WO2006080869A1] The present invention relates to a dispenser (1) for coreless hygiene paper rolls with a housing comprising a storage space (2) for one or more hygiene paper rolls (A-C), a dispensing space (3) terminated with a bottom (4) situated beneath the storage space, in which dispensing space a hygiene paper roll so arranged as to be capable of rotating on a spindle (5) is accessible to a user, locking devices (9), which in the active position prevent hygiene paper rolls that are present in the storage space from dropping down into the dispensing space under the effect of gravity, and operating devices (12,15) to inactivate the locking devices, so that a hygiene paper roll that is present in the storage space drops down into the dispensing space. In accordance with the invention, the storage space (2) is closed off on the top side by means of a removable lid (7), and the spindle (5) is secured to the bottom (4) inside the dispensing space and extends perpendicularly from the upper side of the bottom.
