Abstract (en)

[origin: WO2006076877A1] The invention relates to a motor vehicle gearbox actuator for operation of a motor vehicle gearbox, comprising gearsets which form different ratios, whereby the gearbox actuator has a threaded shaft with at least one first threaded section, embodied as a right-handed thread and at least one second threaded section, embodied as a left-hand thread with just one electric motor for driving in the selection direction and the switching direction.
