Abstract (en)
[origin: WO2006075028A1] The invention relates to a kitchen extractor device comprising a body (80), which is composed of a first body section (10), designed to be mounted in a fixed manner and a second body section (12), which can be displaced in a displacement direction (30) in relation to the first body section (10). The aim of the invention is to provide a kitchen extractor device, which comprehensively covers the cooking facilities and which nevertheless can be easily cleaned. To achieve this, at least part of the second body section (12) forms an external face (72 - 78) of the body (80) that is in transversal alignment with the displacement direction (30).
