Abstract (en)

[origin: EP1842668A2] The device has inkjet print heads (10, 11), which are arranged on respective cross bars (12, 13), which are installed transverse to a printing direction in an operating position in a paper web within the printing machine in or near a print work. The ink jet print heads are arranged in the operating position at a curved surface of a print work cylinder such as guide roller or impression cylinder. Additional paper guide rolls are provided for the stabilization of the paper web in an area of position of ink jet print heads.
