Abstract (en)

[origin: EP1842783A1] The container (1) has a side wall circulating a base, and telescopic lower, middle and upper side walls (2-4) provided at a container height. The telescopic side walls are formed in an integrated manner, and form a closed, circulating side wall section of defined height. The side walls are nested with one another in a collapsed condition. The lower side wall is formed with the base. The side wall units are lockable in defined telescopic positions.
