Abstract (en)
[origin: EP1842825A2] The truck has a mobile base (2), a driver stand (6) for an operator and a load handling device (4,8) and/or the load handling operation. An electrical control system (12) is provided at the mobile base to control the driving operation. The control system has an operating device (14) installed on the driver stand with which the operator gives the control instructions. The control system has an interface (24) for the communication connection with the mobile operating device, using a radio link and operated temporarily outside the driver stand. An independent claim is also included for the delivery method for a forklift truck.
