Abstract (en)

[origin: EP1842973A1] The present invention discloses a versatile multihole watersaving closestool, which concerns sanitary used in daily life. The inner bowl of the closestool is formed as an askew funnel, and the drain port is uplifted. At the backend of the drain port, a multihole connector is connected. A rear drain port, to which a rear-discharging connecting pipe is connected, is provided at the other end of the connector. A vertical discharging opening, to which a vertical connecting pipe is connected, is provided at the bottom of the connector. The afterbody of the integral board is designed to upswell to be a male tab, and is perforated to form a connected space for the connection of the vertical connecting pipe of the multihole connector and the vertical sewer pipe. The present product can be transformed between rear-discharging style and vertical discharging style according to the actual demand, which varies as the different placement of the sewer pipe, moreover the position of the connecting pipe can be adjusted freely. Sewer pipes different in the distance to wall and in the style of rear-discharging or vertical discharging can be conjugated to the same closestool.
