Abstract (en)  
[origin: EP1842975A2] The base has a dry concrete plate (6) partially surrounding a frame structure (1), and a base anchor (2) anchoring the frame structure. The base anchor has anchoring units (9) that are arranged laterally at a distance relative to a longitudinal axis of the anchor, where the base anchor is rammed into the base. The anchoring units are designed like a shovel at a lowest end of the anchor. The base plate and the frame structure are statically isolated from each other. An independent claim is also included for a method for constructing a framework base.
