Abstract (en)
[origin: EP1842992A2] The lock has a primary locking device comprising a locking pin (10) that is operatable with a Bowden cable, and a secondary locking device provided for a closing retainer (7). The secondary locking device has a rotatable safety catch (4) that is formed as a single piece with a catching hook. A leg spring is provided for rotating the safety catch and is supported at a lock housing (1), where the safety catch has a recess (6) for accommodating the retainer and a stop that works against the spring.
