Abstract (en)

[origin: EP1842996A1] The fitting (1) has a follower (8) for driving an operating rod (5) and rotatably mounted in a casing around a rotation axis (9) for moving with respect to a plane of the rod from a side opposite to the follower. The follower includes a driving unit (17) for driving a toothed segment on an angular trajectory, from the follower with respect to another toothed segment (11), above another angular trajectory with vacuum to drive the segment (11).
