Abstract (en)
[origin: EP1843084A1] A semi-recessed luminaire (10) comprising: a housing (12) for a light source (42), the housing being adapted for recessing within a ceiling such that in use a lower surface of the housing is substantially flush with the ceiling, and a light-transmitting cover (14) which is mountable below the housing, the cover having a primary light-transmitting surface (28) which allows light to be transmitted from the light source, or via a reflector, through the cover to an area below the luminaire, and a secondary light-transmitting surface (30) which allows light to be transmitted from the light source, or via a reflector, through the cover to a region of the ceiling positioned to the side of the luminaire.
