Abstract (en)  
The present invention relates to a nozzle (1) and the use of such a nozzle (1) comprising two areas (3, 4) at a fluid outlet end (2) of the nozzle (1) wherein a first area (3) comprises an opening (3) for the outlet of the main part of the fluid and a second area (4) where material of an reduced permeability compared to the first area (3) is provided to influence the flow of the fluid flowing through that second area (4) to change the fluid characteristic at the outlet end (2) of the nozzle (1).
