Abstract (en)
[origin: EP1843374A2] The electric arc contact pin (1) has a contact tip (5) welded at a conductive material, and a reinforcing unit (17) extending inside the pin upto the contact tip, where the contact tip is made of a fire resistant material and the reinforcing unit is made of a mechanically firm material. A core, extending through the pin upto the contact tip, is provided as the reinforcing unit, where the pin is made of the conductive material with small specific resistance.
