Abstract (en)

[origin: WO2006077474A1] The invention relates to an aerial cableway means of transportation, particularly a chair (1) of a chair lift, comprising: a suspension (2) for joining to a cable (4), and; a bottom that supports or forms a seat surface (5). According to the invention, the bottom is provided with an aerodynamic guiding device (7) that extends essentially from the front edge, when viewed in the direction of travel of the means of transportation, up to essentially the rear edge of the bottom.
