Abstract (en)

[origin: DE102005005500B3] The container box (1) for loose material, e.g. laundry washing detergent powder, has a swing lid (4) which, when closed, at least partially overlaps the inner layer (3) of the box. The inner layer projection segment (3a) at the top of the box carries a closure strap (7), acting with a counter piece (6) at the lid, to give a release closure action. When the box is in the original and unopened condition, the lid counter piece is attached to a different segment (3e) of the inner layer and the projecting segment and the different segment overlap at least partially. The two layers are of cardboard, with a stiffer inner layer.
