Abstract (en)

[origin: WO2006079627A1] The invention relates to a mehtod for applying integrated pre-treatment layers to metallic surfaces, especially the surfaces of strip metals, by treatment with a composition containing at least one binding agent, a cross-linking agent, a fine-particle inorganic filler, and compounds comprising at least two thioamide groups or one thioamide group and at least one functional group. The invention also relates to an integrated pre-treatment layer obtained by means of the inventive method.
