Abstract (en)

[origin: WO2006082063A2] The invention relates to: cosmetic or pharmaceutical preparations for preventing and/or treating epithelium that contain nucleic acids, which have sequences suited for forming stem-loop secondary structures; the use of nucleic acids of this type, which have sequences suited for forming stem-loop secondary structures, for preventing and/or treating epithelium, and; fabric softeners, hand detergents, body and hair care products, hair coloring agents or hand dishwashing detergents containing these nucleic acids that have sequences suited for forming stem-loop secondary structures.
