Abstract (en)

[origin: WO2006081783A1] The invention relates to a guiding element (1) for the beginning and/or end area of a protective device (300). The inventive guiding element comprises connecting means (3) for connecting the guiding element (1) to an additional guiding element (4) or to the protective element (2) of the protective device (300) in such a manner that an adjusting angle is formed. A protective device provided with said guiding element and a kit of parts therefor are also disclosed.
