Abstract (en)

[origin: WO2006081698A1] The invention relates to the structured addition to search engines on the internet, intranet and/or individual networks, whereby at least one entry or so-called link or address is selected from a list of information relating to at least one particular search term. Said entry is placed in a separate file or type of basket and subsequently the selected entries and links are optionally structured or ordered and returned to the original list for the particular search term as a new entry or selection and marked as a special selection.
