Abstract (en)

[origin: WO2006080991A2] A method for predicting market information for a plurality of pharmaceutical outlets includes the steps of receiving first data representing purchases and sales of at least one pharmaceutical product from at least one pharmaceutical outlet over a time period in the past, calculating the amount of prescriptions that are not reported in a timely manner at a product-level, computing a product-level projection factor for the at least one pharmaceutical product and using the product level projection factor to estimate the unreported amount of prescriptions.
