Abstract (en)

[origin: DE102005005527A1] The device has a supply part (30) converting an applied voltage into a power control for an induction coil (13) at a carrier mechanism (20). The supply part has a power electronic and a control electronic, where an exhausting device is provided for the power electronic. The device has an electrical power connection and an electrical control connection, and is formed as an installation-finished and/or connection-finished component. An independent claim is also included for a hob tray with an induction heat device.
