Abstract (en)

[origin: EP1844683A1] Chair comprises a seat surface having a higher anti-slipping strength in the region of the front edge (4) than in the region of the rear edge (3). Preferred Features: The region of higher anti-slipping strength extends completely over the seat surface. The seat surface in the region of the higher anti-slipping strength is made from an additional layer which has higher slipping strength than the material of the rear edge.
