Abstract (en)
The present invention is related to a device comprising a body (1,2) and a rotatable portion (3) arranged in connection to said body, characterized in that said device further comprises a safety arrangement (4), comprising a safety portion (9) arranged in connection to said rotatable portion (3), and a blocking means (8) arranged in connection with the body, for blocking a rotational movement of said safety portion (9), and consequently of said rotatable portion (3) and wherein the safety portion (9) is arranged to be releasable from said blocked position by a tilting movement of said safety portion (9). In the preferred embodiment, said device is a spraying device, and said rotatable portion (3) is the spray head of said spraying device.
