Abstract (en)

A modular member (1) is described comprising a panel (3) divided into a plurality of seats (5), each one respectively adapted to house at least one block (7), such blocks (7) being adapted to realise a walking or road surface. A process is further described for laying such modular members (1) for manufacturing a raised walking or road plane, comprising the steps of placing on the ground a plurality of such modular members (1) in order to cover the surface on which the raised plane has to be realised, securing the modular members (1) to the ground; and inserting the blocks (7) into their respective seats (5).
