Abstract (en)
An integrated two-pole switch (1), provided with a socket (2) which supports two pairs of fixed contacts (4a, 4b, 5a, 5b) and is associated with a containment body (6) for a movable connection device actuated by an actuation button (7); the perimetric portion (2a) of the socket (2) has two elongated portions (8a, 8b) which are substantially straight and mutually parallel and are associated with said two pairs of fixed contacts and are mutually connected by means of two connecting portions (9a, 9b). At least one of the two connecting portions comprises a blending portion (10) which has a substantially convex outward shape.
