Abstract (en)

[origin: WO2006072812A1] The invention relates to ski or a similar snow sliding device provided with a mounting plate (12) mounted on the ski top surface and, in particular, bonded or welded thereto for a binding or the parts thereof such as a binding and/or rear plate, wherein said mounting plate (12) which is embodied in a stratified manner can be bonded or welded to the ski top surface in such a way that it practically forms a structural unit with said surface.
