Abstract (en)  
[origin: WO2006082233A1] The invention relates to flame-protected, expandable styrene polymer (EPS) granules provided in the form of an organic bromine compound containing at least 70 per cent by weight bromine and a flame-protection synergist used as flame-protecting agents, wherein at least one part of the flame-protection synergist is provided in the form of a coating. The invention also relates to a method for the production thereof and to the production thereof for self-extinguishing styrene polymer particle foam material.
