Abstract (en)
[origin: WO2006085340A1] A control device (4) for tap, comprising fluid dispensing means (20, 26, 40), in fluid connection to waterworks, and movable from an embedded position visible but contained in an embedded seat (12) to an operating position, extracted relative to said embedded seat (12), extraction means (50, 54, 90) that extract on command and are adapted for releasing or locking said dispensing means (20, 26, 40) from the embedded position to the extracted position, and means that influence in extracted position (60, 64, 142) said fluid dispensing means (20, 26, 40). The control device (4) has small dimensions and is easy and handy to use.
