Abstract (en)

[origin: WO2006084450A1] The invention relates to an insulation element for integrating into the core hole of a toroidal core (2). Said insulation element contains a separating device (1) for forming separate winding chambers and for connecting spacers (102, 102'), said separating device (1) comprising at least one separating strut (11) provided with a first spacer (102) on the end thereof, the width W of the separating strut being smaller than the width b of the spacer (102).
