Abstract (en)

[origin: DE102004048544A1] The stripper (10) comprises a scraping element with at least one opening at the front. Several openings can form a circumferential mesh. The scraper comprises sufficiently flexible material such as polypropylene. Independent claim describes combination of stripper and applicator where the circumference of the stem (2) widens out in the handle area (5). Independent claim describes container for cosmetics with a stripper in the area of the container opening.
