Abstract (en)

[origin: EP1847499A2] The method for adjusting the floor allocations of a number of operating units (50-57) of a lift installation (20) entails travelling the lift car (30) to a predetermined floor (11,13,15,17), activating the operating unit associated with that floor, transmitting position data, which describe the floor in which the operating unit is located, by a transmitting unit to the operating unit and/or to the central control unit (40), and storing the position data in a memory unit (60) of the operating unit and/or in the central control unit.
