Abstract (en)

[origin: US2007256374A1] An improved panel (10) for lift doors, made of metal or another suitable material, including a plate (12) in a basically rectangular shape, whose longer sides extend in height and are folded back with a "C"-shaped profile in the longitudinal direction to form opposed edges or rims (14) turned towards the longitudinal axis of the plate itself, the lower base of the latter being equipped with a basically "S"-shaped back fold including a horizontal flat portion (22) along which a plurality of fissures (24) are made which receive a portion of the lower edge of one or more stiffening members (36).
