Abstract (en)

[origin: US2008150242A1] The invention relates to a skating sports device, in particular skating boot, comprising an exchangeable blade holder ( 14 ), connected to a boot by means of sole and heel plates ( 4 and 5 ). An exchangeable blade ( 1 ) may be clipped in the exchangeable blade holder ( 14 ), which is held under tension in the front and rear region by locking clip buttons ( 2 ) which may be operated without tools. A torsion duplex cross ( 3 ), formed by torsion and flexion bars ( 3 a and 3 b ) absorbs the torsion and flexional forces occurring during skating and neutralizes the same.
