Abstract (en)

[origin: US2006143161A1] A business continuity (BC) system is described that includes an asset database, a BC plan, and a BC portal. The asset database contains a complete and up-to-date inventory of the organization's assets. The BC plan covers a top level administrative unit and all administrative units reporting to the top level administrative unit. The plan contains one or more BC groups that are responsible for a portion of the recovery effort and identifies of one or more mission critical applications that are covered by the plan. The BC portal may be used to maintain the plan, educate employees regarding BC plans, and push information specific to the employee to the employee. The information may be predetermined messages or changes to the employee's role in the recovery effort.
