Abstract (en)

[origin: WO2006087438A1] The invention relates to a method of exchanging data between an application running on a terminal (40) and a memory card (10). The inventive method comprises the following steps consisting in: transmitting data over a wireless link (5) between (i) a gateway (30) which interconnects the terminal with a telecommunication network (1) and (ii) a mobile terminal (20) which is equipped with the memory card (10), said mobile terminal being used for the transmission of data between the memory card and the wireless link.
