Abstract (en)
[origin: EP1849590A1] The press for producing true-to-size compacted objects from powder material has a single measuring rule (47) which at its thermal fixing point is attached on the dieplate, on a support which is decoupled in the vertical direction from the press frame, or on a vertical guide, wherein measuring slides (48,50,52,54) which interact with mounting plates (34-40) are guided on the measuring rule. The vertical guide for at least two mounting plates is decoupled from the press frame with regard to length variations of the press frame or of the vertical guide which act in the vertical direction.
