Abstract (en)

[origin: EP1849932A1] The installation has a winding mechanism with a floating cover winding around a winding roller (13) which is driven by a motor. The mechanism is fixed on a fixation device comprising a fixation base (1) which is fixed on a vertical wall of an edge of a swimming pool, and a bearing support (2) fixed on the base. The base comprises a horizontal positioning cut for the support, permitting to adjust the position of the mechanism to the winding diameter of an immersed cover.
