Abstract (en)
A fitting assembly is provided for pivotal connection of a sash component with respect to a main frame component of an openable window structure. The fitting assembly comprises first and second fitting members (1,2) for connection with opposed side members of the main frame and sash components, respectively, a first end of the second fitting member (2) being pivotally connected with a slide member (4) in the first fitting member (1), and a stay member (5) having a first end pivotally connected with the first fitting member (1) adjacent a second end thereof. Adjusting means (7) is provided at the second end of the first fitting member (1) for adjustment of the position of the pivotal connection (6) of the first end of the stay member (5) with the first fitting member (1).
