Abstract (en)
[origin: EP1849952A2] The mounting system (10) has an elongated metallic holder (20) fastenable at a brick-work using a bolt (22), and a fastening device. A supporting device (26) for the holder is formed such that the supporting device is fastened horizontally and vertically at intrados (28) of a wall opening (14) by the bolt. The supporting device has a side piece that is fastened at the intrados, and another side piece that runs transverse to the former side piece, where the holder is fastenable at the latter side piece.
