Abstract (en)

[origin: EP1850357A2] The display (7) has a mimic diagram of a part of an electrical switching system (1), and an indication of a switching condition of a switch (5) of the switching system in the mimic diagram. A clean mechanical coupling (9) is formed between the switch and the indication, which has switching symbols. The switch has a circuit-breaker (4), and a disconnecting switch and/or earthing switch, and the indication indicates a connection of an earthing process, when the earthing switch and the circuit breaker are closed.
