Abstract (en)  
[origin: EP1850418A2] The connector has an insulation material housing (8) providing a connection space (7) for disposition. A contact pin (3) and an electrical conductor (9) are insertable adjacent to one another in parallel direction, and overlaps with its axial lengths. The conductor has a constructive approved adjustment area transverse to its longitudinal axis. A flat spring (11) of the conductor-clamp connection of the conductor actuates in the direction of the contact pin.
