Abstract (en)
[origin: EP1850433A1] The plug includes central- and body- electrodes (3, 4), the latter being made of wire. The cross sectional outline of the wire is a straight line on the side facing the central electrode, and a curved shape on the opposite side of the wire. The rounded edges of the curve intersect the straight line; i.e. the cross section is generally D-shaped. It is semicircular or is alternatively a circular sector. It may be elliptical or an elliptical sector. For a plug with an M12 thread, the wire is approximately 2.5 mm wide, 1.3 mm high with a rounded edge radius of 0.6 mm.
